

JACK LILLIE

TALENTED SOFTWARE ENGINEER / MOBILE APP DEVELOPER

I'm Jack, I have love to develop cross-platform mobile apps and a passion for developing innovative programs that expedite the efficiency and effectiveness of organisational success. I have 2 years of work experience in technology and writing code to create systems that are reliable and user-friendly, although I have been coding a few years longer. Proven track record in delivering outstanding quality projects and regularly exceeding targets. Deadline-driven and adaptable to the ever-changing industry standards and technologies.

PROJECTS

Walkiez

- Successfully developed the dog walk tracking app with detailed statistics, accurate location tracking using GPS, all visualised on Google Maps.

Plannr

- Created an all-in-one mobile student toolkit that allows students to track their homework assignments and view their timetable all in one useful app.

BreachAlert

- SaaS that applies the haveibeenpwned.com API and utilises it to generate reports for users.

COMPETENCIES

- Ability to spearhead and motivate design team; creates and introduces new ground-breaking concepts.
- Can leverage the use of Flutter to create iOS and Android apps under one codebase.
- Capable of collaborating with clients and suppliers to ensure the project is carried out effectively.
- Good knowledge of health and safety regulations and ensure safe working practices are maintained at all times.
- Ability implement the project plan by effectively following the brief and interpreted blueprint.
- Can conduct daily performance meetings, maintaining accurate data, create and implement countermeasures.

PROFESSIONAL EXPERIENCE

IT ASSISTANT

2018 - Present

Electrical Testing Ltd

- Created the first-ever cross-platform mobile application.
- Successfully implement concepts ensuring a high standard production as well as completion within the deadline.
- Improve service quality and minimise breakdowns through effective maintenance, identifying potential problems in time and immediate adjustments.
- Inspected and performed test runs as well as periodic and remedial works on software.
- Responsible for problem-solving and fixing troubleshooting equipment to ensure the smooth running of operations.
- Maintain high-level internal IT requirements, networking and server setup to enable uninterrupted productivity.

TECHNICAL SKILLS

- JavaScript
- HTML
- Python
- Dart
- Flutter
- React
- Node.js
- Git
- WordPress
- Firebase
- Vercel
- Microsoft Office
- Database Management

AREAS OF EXPERTISE

- Software Development
- Project Management
- Creative Direction
- Strategic Planning
- Project Management
- Design Lifecycle
- User Interface Design
- Product Improvement
- Process Development
- Coding
- Troubleshooting & Maintenance
- End-User Support

EDUCATION

A-Levels; Mathematics & Computer Science**

7 GCSEs; Mathematics A, Combined Science B, English B, Creative iMedia B.

North Walsham High School
Google IT Automation with Python

Google on Coursera

PERSONAL SKILLS

- Problem Solving
- Interpersonal Skills
- Analytical
- Leadership
- Attention to Detail
- Time Management

** No grade due to COVID-19, since I was self-taught I had no teacher to give me predicted grades
